## **DETAILED ACTION**

### ***Response to BPAI Decision***

In the decision by the Board of Patent Appeals and Interferences (BPAI) mailed 8/6/2010, the rejections of claims 1-39, 46-49, 65-69 and 80-82. The following action is a response to the decision rendered by the Board of Patent Appeals and Interferences (BPAI) mailed 8/6/2010. Claims 1-39, 46-49, 65-69 and 80-82 are pending in the application and are allowed.

### ***Allowable Subject Matter***

Claims 1-39, 46-49, 65-69 and 80-82 are allowed. The following is an examiner's statement of reasons for allowance:

#### **Claims 1, 31, 46 and 65:**

The Board of Patent Appeals and Interferences has interpreted the Examiner reliance on the teachings of Clynn as directed to a method for producing custom fitted medical devices, but find that the reference does not teach step of interviewing a patient to determine at least one patient attribute and querying a digital repository for a subset of medical device components based on the at least one patient attribute.

Because the prior art does not teach or disclose the above features in the specific manner and combinations recited in independent claims 1, 31, 46 and 65 as further interpreted by the Board of Patent Appeals and Interferences, claims 1-39, 46-49, 65-69 and 80-82 are hereby deemed to be allowable.

Originally numbered dependent claims incorporate the allowable features of originally numbered independent claim 1, 31, 46 and 65, through dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

In related art (6,463,351) Clynnch et al. teaches a method for producing custom fitted medical devices

In related art (6581204) DeBusk et al. discloses a modular tracking and profiling system.

In related art (20010051787) Haller et al. discloses a system and method of automated invoicing for communications between an implantable medical device and a remote computer system or health care provider

In related art (20020099631) Vanker et al. discloses a method and system for transferring information between multiple buyers and multiple sellers.

The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure as background material and is not of particular significance. These prior art patents fail to teach or fairly suggest interviewing a patient to determine at least one patient attribute and querying a digital repository for a subset of medical device components based on the at least one patient attribute.
